(二) 現代文選

閱讀下面的文章，完成46-50題

匹夫有責論

去年我的《匹夫無責論》獲得不少讀者的好評。大家都欣賞我講得爽快尖銳，“發人之所未發，言人之所不敢言”，但也有幾位讀者心中還有疙瘩。一位老友來信說：“誠如兄所言，難道我們這十億匹夫，與國家興亡真是毫無關係嗎？”這責問是很嚴肅的。我不能不再寫一篇《匹夫有責論》來作辯解和補充。

問題的焦點在顧炎武所說的“天下興亡”。這“天下”二字，在古文習慣用法中意義常是不固定的，可指全世界，指全國，指一個朝代，也可指許多朝代。古人沒有今人的國家意識，他們往往把一個朝代、一個政權稱為“天下”。顧炎武憂心忡忡地大叫“天下興亡，匹夫有責”，是為明朝政權的危機而發急的。朱元璋贏得了蒙古人的政權，顧炎武就說是“天下興了；朱由檢在煤山上自盡，李自成入京，他就說“天下”亡了。

因此，我在《匹夫無責論》中所舉的興亡例子，都是一個朝代的興亡。天下興，是堯舜、禹湯、文武、周公的功勞，也說不上責任。天下亡，是桀紂、陳後、隋煬、宋徽的責任，自負盈虧，都和“匹夫”無關。匹夫既不能興國，也不會亡國。天下興亡，對匹夫來說，只是換一個奴隸主罷了。

“天下”一詞我們現在不用了，即使做古文也不敢用了。目前這個語詞的意義是“國際”、“世界”、“寰球”等。將來有了“星際關係”，這個詞就該報廢了。

在我們中國這一塊東亞大陸上，有過許多朝代互相更換或同時並存。漢、唐、宋、元、明、清，是中國；戰國七雄、三國、十六國、南北朝、五代十國，儘管各自擁有“國”的名稱，但在匹夫們和歷史學家的觀念裡，也屬於一個中國。我們有許多民族，雖然華夏到漢曾經龐然獨大，但一切蠻、夷、戎、狄，儘管各自有自己的政治、經濟、社會結構，甚至國號，但他們都屬於一個中華民族。“率土之濱，莫非王臣”“四海之內，皆兄弟也”。

民族有消長，朝代有興亡，而中國始終存在。中國匹夫們對國家負責，在多少風狂雨驟、山崩地裂的天災人禍之後，始終保持這個國家不自亡，也不被亡。中國的偉大，歸根結底應歸功於中國的“匹夫”，而聖君賢臣、官僚政客不與焉!

(作者：施蛰存。有刪改)

- A. 明朝

9-YEAR-OLD BOY SAVES FRIEND'S LIFE IN ICY POND

By Karen Massie

Nine-year-old Victor Flores is being called a hero after saving a friend who fell through an icy pond.

Flores said he was a bit reluctant on Monday to walk close to a man-made pond on his grandfather's property in the Amador County town of Pioneer. He explained that when he was there a week ago with a seven-year-old neighbour, the ground was covered with two feet of snow and the pond had iced over.

Flores said he and his friend, Aiden, were chasing some ducks when Aiden decided to venture out onto the ice. "I told him not to do it," Flores said. "But he kept saying come on, it's okay." Within minutes the fragile ice broke and Aiden fell into the frigid water that was about 15 feet deep.

Flores tried to grab his friend. "And then I slipped on the edge of the pond and I fell in, too," Flores said. "I was shivering and I lost both of my boots as soon as I fell in."

He also lost his hat but probably didn't notice because Aiden panicked and was flailing in the water. Flores explained, "He was screaming my name and trying to pull me under so he could stand on me."

But Flores kept his cool and pulled Aiden toward the steep concrete rimming the pond. "I grabbed onto a crack at the edge and pulled myself out," said Flores. "Then I ran and got a pole to pull him out. But Aiden was having a hard time holding on and kept slipping off."

Flores didn't give up and was finally able to haul his friend out with the help of his grandmother. She ran to the pond when she realized the boys were in trouble.

"When we arrived Aiden was very, very cold and in shock from being in the cold water," said California Fire Department Captain Mark Chatterton, who was among the rescue workers called to the scene.

Chatterton was surprised to learn that Flores had the presence of mind to pull his friend to safety.

“They could have both drowned,” Chatterton said. “In my mind he was the true hero of this incident. We just came in and took over the efforts that he started.”

Both boys were transported to the hospital but recovered and were sent home.

THE WARMEST WELCOME

By Harmiani Octaviamin

In July last year, I was on my first overseas journey from Bali to join my husband, who had moved to Australia two months before to study. I was loaded up with baggage and two small kids (four-and-a-half and two-and-a-half years old at the time). I was so worried that I wouldn't be able to manage the journey on my own, I was unable to get excited about my children being reunited with their beloved daddy.

I am a Muslim and wear a veil and, as I had never been to Australia, I did not know how my appearance would be received. But I had to go.

My uncle drove us to the airport. With my younger son on my hip, I had to push the baggage trolley while keeping a close eye on my older son. It was an exhausting balancing act.

On the plane, my children played for a while then fell asleep. Now I could relax, I thought, and I watched a couple of movies. But my children were sleeping so soundly I couldn't wake them up when we landed in Darwin. How could I get them both off the plane and also manage our luggage?

“Do you want us to hold the children?” asked a friendly woman. “Yes, please!” I replied.

“Thank you.” Smiling, she picked up my older son and her friend, another woman, carried my youngest. I had to go through immigration before collecting my luggage - all the while, my two boys slept on. But the two women very patiently waited until I was finished with immigration. In the luggage-claim lounge, a man in his 40s gave me a hand as he saw me struggling to take my big bags off the conveyor belt.

The two women were still holding my sons when we met my husband in the arrivals lounge. We thanked them all for their golden hearts and wished them good days for the rest of their lives. This episode impressed us so much - what a nice welcome to Australia!

HYDROELECTRIC POWER FOR AFRICA FROM CONGO DAM

The Congo River has the largest water mass of all African rivers. It also has the potential to produce renewable energy for millions of people.

Recently South Africa has signed a deal with the Democratic Republic of Congo in which it agrees to buy large amounts of electricity from the African country's water power stations.

The Grand Inga, when completed, will create almost as much power as the Three Gorges Dam in China. The hydroelectric power station will be built in a valley about 50 km upstream from the mouth of the Congo River. Up to 6 separate power stations will produce over 40,000 megawatts of electricity.

The project will get money from the World Bank and other development banks around the world. South Africa, the continent's largest industrial country, is also expected to pour billions into the project. Nigeria and Egypt have already announced that they are willing to buy energy from the new dams.

The first generator is scheduled to produce electricity as soon as 2020, a time when much of Africa will be in desperate need of power.

The dams are being constructed in a country where only 10% of the population have electricity. Especially in remote villages, electric power is rare and often turned on only for a few hours a week. Sometimes there are only small generators that produce barely enough electricity to power up the villagers' cell phones. Many people depend on candles for light.

There are already critical voices in Congo who are against the dam project. They claim that most of the energy will go to other countries and will only make the corrupt government richer. Large parts of the population will continue to be without energy.

The project's supervisors, however, say that The Grand Inga project will be completely funded with money from foreign investors.

Two existing dams in the region date back to the 1960s and 1970s. According to energy experts, if the government had modernized them they could produce enough power for most of the African country.

Choose the one best alternative from the four options (a), (b), (c) and (d):

61. How will the construction of the Grand Inga dam be funded?
- With money from the World Bank.
 - With investment from foreign development banks.
 - With billions of dollars from South Africa.
 - All of the above.
62. Which of the following countries will Congo export electricity to?
- South Africa.
 - Egypt.
 - Nigeria.
 - All of the above.
63. Which of the following statements describes the current status of electricity supply in Congo?
- Electric lighting is available for many people.
 - The already existing dams provide enough electricity for most of the country.
 - Only a small portion of the population have electricity.
 - People in remote villages have electricity several hours every day.
64. Some people in Congo do not support the Grand Inga project because...
- They are against investment by South Africa.
 - They think the project is too costly.
 - They are worried that government officials will benefit more than ordinary people.
 - They are worried that the project will not create enough job opportunities.
65. According to the article, which one of the following statements is true about the hydroelectric power station constructed near the Congo River?
- It will supply electricity to all of Congo's population.
 - It will be financially supported by the government of Congo.
 - It will be completely funded by foreign investment.
 - It will be the largest hydroelectric power station in the world.
66. How many already existing dams does Congo currently have?
- One.
 - Two.
 - Three.
 - Six.

BALD EAGLES
by Scot Hoffman

A bald eagle's white head may make it look bald. But actually the name originally comes from an old English word, "balde," meaning white. These graceful birds have been the national symbol of the United States since 1782. Bald eagles were on the brink of extinction because of hunting and pollution. But laws created almost 40 years ago have helped protect them, and they've made a comeback.

Female bald eagles are a bit bigger than males. Their bodies can be 3 feet (1 meter) long, and their wingspan can be 8 feet (2.4 meters) across. That's about the distance from the floor to the ceiling! Babies, called eaglets, are born light gray, then turn brown. When they are 4 to 5 years old, they develop their normal white heads and tails. In the wild, they can live to be 35 years old or more.

Eagle nests are called aeries (pronounced "AIR-ees"). Bald eagles build their nests at the very top of tall trees so the eggs will be safe. Some parents come back year after year to the same nest, adding more sticks, twigs, and grass each time. One old nest in Florida grew to 9 feet (2.7 meters) wide and 20 feet (6.1 meters) tall and weighed more than 4,000 pounds (1,814 kilograms).

One of the most awesome sights in nature is a bald eagle swooping down from the sky to grab a fish. They can soar over 10,000 feet (3,048 meters) high, and their great eyesight lets them see fish up to a mile (1.6 kilometers) away. When they attack, they drop down at up to 100 miles (161 kilometers) an hour! Then they glide just above the water, snag a fish with their feet, and fly off to eat it.

These carnivorous birds can only lift about half their body weight. If they catch a fish that weighs more than that, they might hang onto it with their talons and "swim" to shore using their huge wings.
